

LBT 227: Why J2788 Standard

What if you could save 30 minutes each day in the shop? Do you have some areas in the shop where you might be wasting a little bit of time? You might have a machine that's not quite up to its 100% potential? This DVD shows you why J2788 makes a difference!

J2788 air conditioning machines came onto the market about three years ago. If you purchased one in the last three years, chances are you purchased a J2788 machine. But what are the differences? Bob Pattengale talks about them in this video.

J2788, the new standard, is based on research that was done with the Society of Automotive Engineers and the Mobile Air Conditioning Society working in conjunction with car manufacturers.
